EXECUTIVE SUMMARY

There has been exponential growth in the cryptocurrency world since the birth of Bitcoin by Satoshi Nakamoto through the release of the Bitcoin Paper in 2008. The Bitcoin whitepaper gave rise to a new era of finance that is more secure, efficient, and "supposedly" decentralized.

Currently, there are more than 400 cryptocurrency exchange platforms in centralized and decentralized exchanges worldwide and in operation. Many of them can handle large amounts of cryptocurrency, but a lot of problems are popping up.

Therefore, our LEVEREX focused on this for a long time and required a lot of time and development period. We are aware of the risk of many hacking, and there are over 1 trillion hacking cases a year. We recognized their hacking methods and worked hard on the security side. Most of the hacking accidents are caused by the leakage of the private key of hot wallets. So it proceeds with a cold wallet and as an offline data storage device that is not connected to the Internet. It is cumbersome to connect online only when using a wallet and to use it every time you make a transaction.

To secure the disadvantage of slow transaction speed, we hold assets in cold wallets and hot wallets, Check the weight from time to time and match most weights to make the existing security system more secure.

LEVEREX is safe, solves problems with users when withdrawing, and it provides a solution to the inconvenient part of cryptocurrency as much as possible to provide safe convenience.

LEVEREX started as a specialized copy trading and system trading large exchange. Both spot and futures are available, and the NFT split exchange is scheduled to open as well.

Copy-trading starts with

- people who have experience in finance with skills such as FX, OTC, etc
- those who are certified, and those with the highest yield

- those who have received and have certified copy-trading applications from all over the world will be able to perform copy trading.

More accurate and certified copy trading will be achieved by limiting the number of people who are not certified

As an investor, we will focus on gaining trust from the investor's point of view.

LEVEREX is not only an exchange, but also a trading system, copy-trading platform, and an ecosystem

We will create an exchange that coexists together.

System trading is the act of constantly buying and selling coins using a certain trading method. It reads data and creates trading rules as a method of continuous trading by the computer. Minimize losses even in the existing downtrend and avoid system trading that has been a problem in the past.

In addition, LEVEREX makes both spot and futures simple and convenient among existing exchanges. It was created so that anyone can easily access it.

As a split NFT exchange rather than the existing NFT exchange, it is better than the existing NFT exchange in line with the flow of coins. It is made to be more trendy and accessible from the customer's point of view.

INTRODUCTION

The Leverlex Exchange is an exchange that we have been waiting for a long time. We've acquired a lot of skills to solve existing problems with the latest technologies. We plan to introduce all these technologies to the LEVEREX Exchange.

We produce specialized copy trading and system trading exchanges. We're going to do it. We have more expertise than anyone else, so maybe you guys...

will be satisfied.

It will be listed on large exchanges as well as its own exchange. Rewards and gifts are also available.

We are also thinking of a split NFT exchange. With a system different from the existing NFT Marketplace and a fresh system, you will be able to join us.

LEX will do a lot of things

We will do our best to become a coin that can share a lot of happiness. We will increase the price through continuous burning and benefits. You can even farm interest through Defi. If you have a lot of LEX coins, you can get a fee discount of up to 200 Recommendation fees Up to launchpad and airdrop. We will give you many rewards. So we're going to have a lot of LEVEREX coins. You can also expect a rise in prices. In addition, we keep our assets safe with multiple maintenance and signing.

LEVEREX has a variety of trading pairs.

Currently, it supports BTC, ETH, ETC, BNB, which are the main coin and Altcoin.

Currently, LEVEREX uses take-loss/stop-loss function, plan consignment, quick transaction, take-loss/stop-loss setting, IOC, and FOK. There is a plan entrustment-one-touch withdrawal, etc., and users can freely switch between cross-margin and isolation margin.

LEVEREX copy trade

Even beginners who are new to trading can search for the highest level of LEVEREX traders or returns. Anyone can easily trade through copy trade. You can access LEVEREX and choose excellent traders at any time.

Customers do not need to order separately, nor do they need to study market trends. Follow the selected trader. A transaction begins, and transaction data is transparently disclosed to anyone. You can see the profit on every trade. You can also check real-time revenue data. We will help you get trading experience based on the most popular devices and platforms.

The Non-Fungible Token (NFT) market is mushrooming in recent years. The concept of NFT originally comes from a token standard of Ethereum, aiming to distinguish each token with distinguishable signs. This type of token can be bound with virtual/digital properties as their unique identifications. With NFTs, all marked properties can be freely traded with customized values according to their ages, rarity, liquidity, etc. It has greatly stimulated the prosperity of the decentralized application (DApp) market. As of May 2021, the total money used on completed NFT sales reached about \$35million. The thousand-fold return on its increasing market draws huge attention worldwide. However, the development of the NFT ecosystem, community, and exchange is still in its early stage, and the technologies of NFTs are pre-mature and yet untapped. Newcomers may get lost in their frenetic evolution due to the lack of systematic guides on how to use NFTs, cryptos, and such platforms.

Although the NFT market keeps growing, purchasing, selling, and storing digital NFT assets remains quite complicated and in some instances even insecure. We aim to remedy this by providing beginner and advanced NFT enthusiasts, investors, and institutions with a user-friendly NFT exchange that combines the best practices of decentralized trading platforms. Our intuitively easy-to-use exchange alleviates counterparty risk, vulnerabilities to fraudulent activities, and provides competitive transaction fees. We have an acute focus on customer service and provide support at all

times. Our aim at LEVEREX exchange is to provide security, transparency, and a pleasant user experience while keeping NFT exchanging simple, understandable, and easy to use.

LEVEREX is not just another typical cryptocurrency exchange. LEVEREX is the first of its kind in the NFT space and aims to accomplish more than simply tackling key pain points that the market knows right now. LEVEREX exchange aims to support mass NFT, crypto, and blockchain adoption. We strongly believe that this is critical to succeeding in the journey towards the adoption and recognition of NFTs as a valuable asset class. LEVEREX exchange is part of the digital and financial revolution we are experiencing. Soon people will transfer millions of digital NFTs, arts, collectibles, and more, simply through their smartphones or computers to handle their day-to-day finances.

The LEVEREX exchange digital asset provides holders with access to unique value offerings such as decreased trading fees, priority access to newly minted NFTs, access to copy trading functionality, Fractionalization of NTF functionality, Peer-to-peer function, and more. Not to forget, once covering the running costs, LEVEREX exchange redistributes all platform trading fees to LEX holders. This means that according to the number of tokens you are holding, you will receive a part of this pool.

INDUSTRY OVERVIEW

Monthly Bitcoin futures trading volume is close to \$1.77 trillion. On the other hand, the monthly trading volume of the spot market, including altcoins, is about \$627 billion. Literally, futures dominate the spot.

In 2022, the market is expected to expand. We plan to join the LEVEREX Exchange in line with that era. We are looking at a bigger market by providing specialized technology and many technologies.

Starting with copy trading and developing a recommendation system, Functions were added and many users in the LEVEREX space plan to gradually expand the features you can enjoy.

They are easy to follow and do not require much study. You just need to check the propensity and return for each trader and make a selection. LEVEREX is not designated for any one country, anyone can become a trader.

By verifying the trader's transaction history, make more strict screening rules and Traders who are not satisfied with the traders can limit the number of trades; this will guarantee efficiency and support from many countries.

For investors such as USDT perpetual contract, copy trading, Quanto swap, etc, we provide optimized services and connect directly with trading experts using one-click copy trading. We will be able to provide a copy of a stable return on investment method. In addition, with many investors and customers, we will provide you with a view of more verified traders.

In recent years, NFTs have garnered remarkable attention from both the industrial, financial and many other communities. It was reported that the 24-hour trading volume on average of the NFT market is 4,592,146,914 USD, while the 24-hour trading volume of the entire cryptocurrency market is 341,017,001,809 USD. The liquidity of NFT-related solutions has accounted for 1.3% of the entire cryptocurrency market in such a

short period. Early investors obtain thousand-fold returns by selling unique digital collectibles. As of May 2021, the NFTs-related market has significantly increased compared to that of 2020. Specifically, the total number of sales was 25,729 and their total amounts spent on completed sales reach 34,530,649.86 USD. In particular, the total number of primary-market sales occupies 17,140, while the number of secondary sales (user-to-user) is 8,589. Correspondingly, the total USD used on primary market sales is 8,816,531.10. Besides, the active market wallets achieve 12,836, which is still increasing at a high speed as time goes. Surprisingly, the sale of NFTs was estimated at 12 million in December 2020 but exploded to 340 million within just two months in February of 2021. Such skyrocketing development makes NFT become a craze, or even be described by some as the future of digital assets.

Besides the above data, people have expressed interest in various types of NFTs. They participate in NFT-related games or trades with enthusiasm. CryptoPunks, one of the first NFT on Ethereum, has created more than 10,000 collectible punks (6039 males and 3840 females) and further promoted the ERC-721 standard to become popular. CryptoKitties officially put NFTs on notice and hit the market in 2017 with the gamification of the breeding mechanics. Participants fiercely competed at high prices to auction the rare cats, and the highest price reaches more than 999 ETH equivalent to 3M USD). Another outstanding instance is NBA Top Shot, which is an NFT trading platform used to buy/sell digital short videos of NBA moments. Thousands of NBA fans from around worldwide have collected over 7.6 million top shot moments, building the roster of rookies, vets, and rising star players. Following projects also enjoy great success including Picasso Punks, Hashmasks, 3DPunks, unofficial punks, Polkamon, Chubbies, Bullrun Babes, NFT box, etc. There is no doubt that there is a hype cycle surrounding NFTs where most products can be sold with high prices, some even hundreds or thousands of ETHs. Besides games and collectibles, NFTs also promote the development of art, ticketing event, value, IoT, and finance. Other types of surrounding markets play important roles as well to provide instant information and secure environments like statistic websites. Despite NFTs having a tremendous potential impact

on the current decentralized markets and future business opportunities, the NFT technologies are still in the very early stage. Some potential challenges are required to be carefully tackled, while some promising opportunities should be highlighted.

LEVEREX EXCHANGE

LEVEREX Exchange aims to become a large exchange, and many features will be activated.

It is the first exchange to offer bigger, better, and more options.

1. Specialized copy trading + system trading exchange production
2. Scheduled to be listed on 10 or more large exchanges
3. Both rewards and gifts are possible
4. Simultaneous opening of split NFT exchange

Features of the LEVEREX exchange

LEVEREX is an exchange that values mutual trust. We worked round the clock to stay away from hacking and hackers, and in order to gain trust with our customers, we invested as much time as possible. In addition, when holding the initial LEX token, many people benefit, and when using Copy Trader and System Trader we use all of these tokens and prioritize staking. We will burn LEVEREX tokens from time to time, giving priority to price increases.

1. Margin

With margin trading, users of the LEVEREX exchange platform can leverage borrowed funds from the platform to trade other digital assets, which serve as collateral for the loan taken. In essence, NFTs can be used as collateral in order to borrow digital assets on the platform.

2. Futures

Futures are derivative financial contracts that obligate the parties to transact digital assets at a predetermined future date and price. The buyer must purchase or the seller must sell the underlying asset at the set price, regardless of the current market price at the expiration date.

3. Copy-trading

Copy-trading enables platform users within the LEVEREX exchange to copy automatically trading positions opened and managed by other selected individuals within the exchange.

4. Split NFT (Fractionalization)

Split NFT offers a way for owners of NFTs to make ownership of these NFTs more accessible to the masses. It is also called Fractionalization, which means splitting the ownership of an NFT into smaller fractions. This makes it possible for several people to own collectively a single NFT.

Properties of the LEVEREX Exchange

- **Verifiability:** The LEVEREX token metadata and its ownership can be publicly verified.
- **Transparent Execution:** The activities of LEVEREX Exchange include buying, selling, and staking are publicly accessible.
- **Availability:** The LEVEREX ecosystem never goes down. Alternatively, all the tokens issued are always available to sell and buy.
- **Tamper-resistance:** The LEVEREX exchange metadata and its trading records are persistently stored and cannot be manipulated once the transactions are deemed as confirmed.
- **Usability:** Every token on the LEVEREX exchange has the most up-to-date ownership information, which is user-friendly and information-clearly.
- **Atomicity:** Trading on LEVEREX Exchange can be completed in one atomic, consistent, isolated, and durable (ACID) transaction. The trades can run in the same shared execution state.
- **Tradability:** Every token and its corresponding products can be arbitrarily traded and exchanged.

THE LEVEREX EXCHANGE TOKEN (LEX)

We at LEVEREX are making use of decentralized login management and access to one's wallet therefore, we do not hold any data in our user databases, making the entire process smooth and secure. Users will have two login sessions on the platform. One session will be for the tokens and one for the NFTs.

As described above, the NFT session will only serve to secure the underlying while the token session will allow users to do decentralize trading and exchanges.

LEVEREX token, LEX, is a BEP20 token and a smart contract system built on the Binance smart chain and designed to be used by the ecosystem of LEVEREX and all other exchanges. Following this standard, LEX tokens are easily transferable between users and different platforms with compatible wallets and can be smoothly integrated into any exchange.

LEX token is the cryptocurrency that will be created for users of our Exchange platform as well and will be available at our private and public sales. It is the preferred payment method on the platform as it eliminates the time-consuming banking process and unnecessary fees. It is also recorded on the decentralized and distributed ledgers of blockchain and, as such, will be secured and immutable. LEX tokens will be listed on the LEVEREX exchange and all major cryptocurrency exchanges to provide easy access to the tokens and their trading of them.

Token Utility

The LEX token has many use cases both within the LEVEREX exchange and outside the platform. The following are the ways the LEX token would be utilized on the platform.

1. Discounting fees

You can use the LEX token to pay for fees on the platform and get discounts of up to 50% discount. Fees to cover include:

- Exchange fees
- Withdrawal fees

- Listing fees
- Other fees

2. Fee doubling

Holders of LEX tokens up to 3000 LEX or more, would get recommended fee double with a basic option of up to 20%

3. Special creation NFTs showcase

LEX tokens would give users access to special creation NFT showcases where they can buy these NFTs with high levels of rarity.

4. Holding for Special creation NFTs

Users that lock or hold their LEX tokens for a period of six months or longer would be eligible for the distribution of the Special Creation NFTs

5. Defi Staking

Staking LEX tokens for the launch of some projects would give you access to rewards in both LEX tokens and the underlying token of the project.

6. Token Airdrops

Holders of LEX tokens are entitled to certain airdrops when they hold for the stipulated period. A snapshot would be required before the distribution of the Airdrop tokens.

7. Expected worth

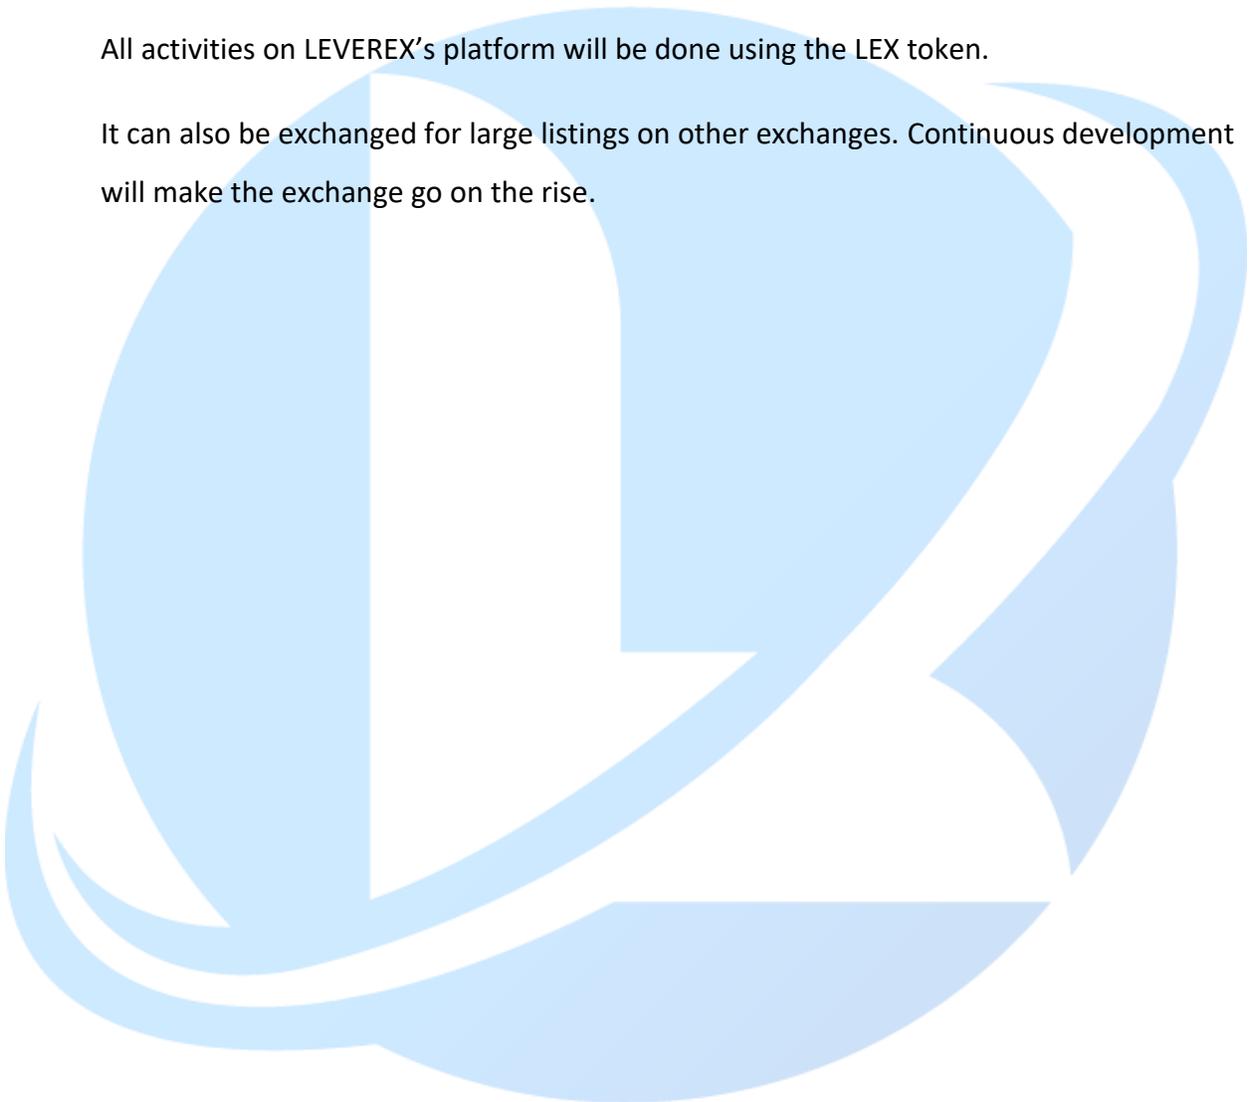

We will expand the places where LEVEREX Coin is used. In addition, we will maintain and raise the price through continuous incineration/burning. We will work hard to give trust to our customers. For the first time, we plan to go public with the goal of being listed for at least \$2.5 - \$3.0

Copy Trader is also equipped with a locking feature and the company and management team's lock. We will maintain the exchange market. A lot of usage fees are paid by LEX incineration rather than the company's profit. It will be used, and the exchange will gradually move forward.

You can see many expected benefits just by holding the LEX coin.

All activities on LEVEREX's platform will be done using the LEX token.

It can also be exchanged for large listings on other exchanges. Continuous development will make the exchange go on the rise.

TOKEN ECONOMICS

Token Name: LEVEREX

Token Ticker: LEX

Token Type: BEP20

Total issuance: 500,000,000 LEX

Listing Price: \$2.5 - \$3

TOKEN ALLOCATION

Private Sale – 20% = 100,000,000 LEX

Public Sale – 10% = 50,000,000 LEX

Company Holding – 10% = 50,000,000 LEX

Advisors and Partners – 5% = 25,000,000 LEX

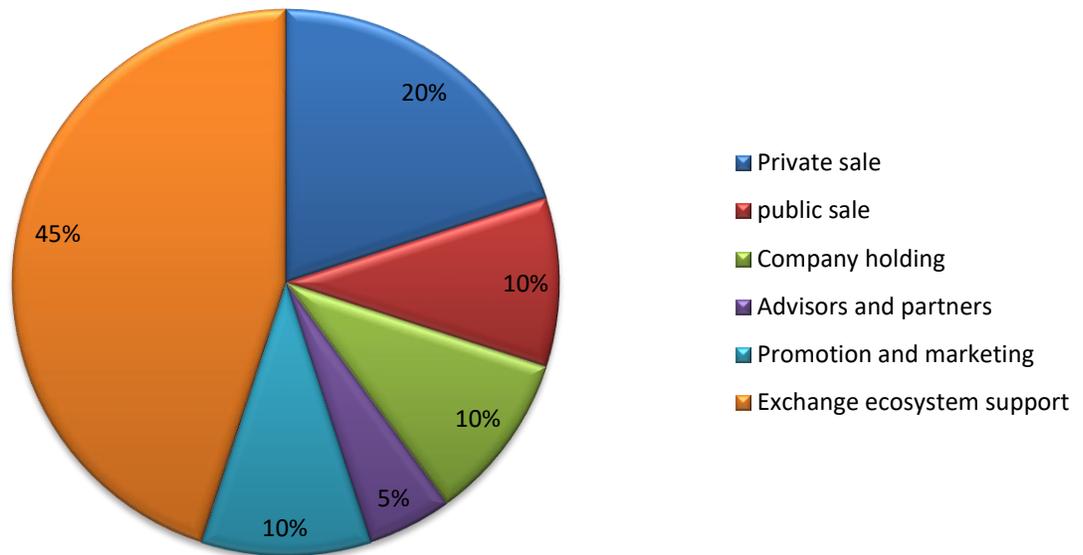

Promotion and marketing – 10% = 50,000,000 LEX

Exchange Ecosystem Support – 45% = 225,000,000 LEX

All public non-selling tokens are burned.

Burn Mechanics: A total of a maximum (200,000,000) tokens will be burned

ALLOCATION

Company holdings

The company holding would be a 10% allocation with a holding/locking condition of 3 years and gradual unlocking after the lock period.

Promotion and marketing

10% would be allocated to marketing the project and promoting it including Bounty, Airdrops, etc.

Exchange ecosystem supporting funds

45% would be allocated to support the Exchange ecosystem.

Advisors and partners

Our partners and advisors would be allocated 5% with a locking period of 2 years and then a gradual unlock of the tokens.

LEX TOKEN ROADMAP

Q3 2021

- Initial Whitepaper release Ver1.0
- Leverex development begins
- Setup of team members

Q4 2021

- Copy trading development
- System trading development
- Referral system development

Q1 2022

- Creation of New LEX Token
- Beta test of Spot, Derivative features on the platform

Q2 2022

- Exchange Platform Launch
- Listing on Global exchange(10 Global exchange)
- Airdrop Plan(listed on Exchange)
- Burning LEX token (2M tokens)

Q3 2022

- Integration with NFT market place
- Crypto Competition and events- 1st round
- Launch NFT creation dedicated Exchange
- Burning LEX token (5M tokens)

Q4 2022

- Crypto Competition and events- 2nd round
- Launch Lex token Defi service
- Burning LEX token(10M tokens)
